Care Chemicals

General characterisation

Chemical description

Mixture of alkyl glucoside with fatty acid glyceryl ester

Labeling information

INCI name(s)

Coco-Glucoside (and) Glyceryl Oleate

Active ingredient information

Ingredient	CASR-No.	Remark
Coco-Glucoside	68515-73-1, 110615-47-9	
Glyceryl Oleate	68424-61-3	

Product properties

Appearance

Transparent to slightly yellowish viscous product with characteristic odor

Example of use

The product is preferably used as lipid layer enhancer for the production of surfactant cleansing preparations. On account of its viscosity-increasing properties Lamesoft® PO 65 contributes to the viscosity formation in cosmetic cleansing preparations such as shower gels, foam baths, shampoos and baby products. The presence of the dermatological high value alkyl poly glycoside contributes with approx. 1.7 % to the final washing active substance considering a dosage of 5 % Lamesoft® PO 65. Correspondingly the amount of the basic or secondary surfactant can be reduced.

Stabilising additives / Auxiliaries

The Product is unpreserved
