Product properties

Appearance

Yellowish, pasty and pumpable ether sulfate mixture

Example of use

The product is manufactured from fatty alcohols of native origin by ethoxylation and subsequent sulfation. Its balanced surfactant properties and good dermatological compatibility make it eminently suitable for use as a basic surfactant in mild cleansing preparations, such as e. g. baby shampoos and personal care. Due to rheological reasons Texapon® ASV 70 Spezial does not contain Mg²⁺ ions. By addition of 7.6 % MgSO₄ x 7 H₂O (referring to the dosage Texapon® ASV 70 Spezial) the compatibility can be increased up to the level of Texapon® ASV.
