Enabling Choices for I&I with EU Ecolabel

Building Cleaners according to new criteria

In I&I and in Institutional Cleaning and Sanitation, in particular, cleaning work is tendered in most cases. Especially if public authorities are responsible for the tender, they increasingly use their purchasing power to choose goods and services certified with the EU Ecolabel. Generally, participation in the tender is only granted to companies with an Ecolabel product line. As a consequence, the I&I detergent manufacturers offer a growing number of product lines that comply with the EU Ecolabel. In 2017, new criteria for Hard Surface Cleaners (Decision (EU) 2017/1217) and Hand Dishwashing Detergents (Decision (EU) 2017/1214) have been published and came into force.

We have developed several test formulations according to the new EU Ecolabel criteria for the I&I Cleaners types mentioned below and have in most cases no label according to the European CLP (EC) N° 1272/2008.
